60°S Zonal Mean Zonal Wind
70 hPa    MERRA2

![Graph showing 60°S Zonal Mean Zonal Wind from 1979 to 2021. The graph includes a line chart with data points indicating wind speeds at different intervals throughout the year. The x-axis represents months from January to December, and the y-axis represents wind speed in meters per second (m s⁻¹). The data is color-coded to show different percentiles: 10%, 30%, 70%, and 90%. The graph highlights significant variations in wind speed, with peaks and troughs visible throughout the year.](image-url)
